

Established in 2010, The Coalition of Hope Foundation, Inc. (COH) is a US-based 501(c)(3), non-profit, charitable organization that provides global humanitarian assistance and disaster-relief. In the past decade, COH has supported a broad range of US (domestic) and International missions and has partnered with a variety of global charities, including; International Red Cross, the American Red Cross, Jewish Family Services, Islamic Relief USA, Catholic Charities, the Salvation Army, Free the Children, Partners in Health, Project Medi-Share and many others.

Recent examples of our broad-based initiatives include the following:

"PROJECT EXCELSIOR" (2021)

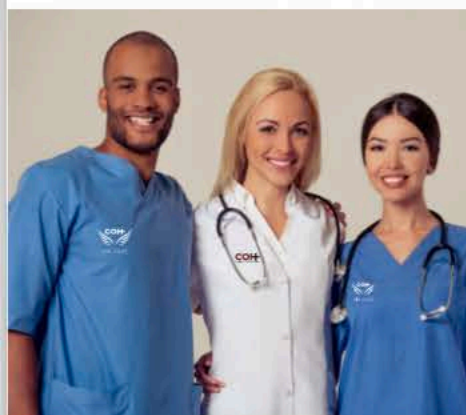

Unprecedented ship-based platforms, dedicated to humanitarian assistance and disaster relief in the immediate aftermath of catastrophic occurrence.

"AIR CARE" (2021)

COH is developing flight-based, aid-distribution & emergency evacuation technologies utilizing Project Excelsior platforms.

COH AIR CARE will utilize sophisticated medical drones for patient evacuations from remote or high risk locations using "medical evacuation pods" (Med-Pods). These will be operated from our Project Excelsior logistical platforms. AIR CARE also includes a pioneering approach to the delivery of emergency medicine and supplies customized for Humanitarian Assistance and Disaster Relief environments. This allows for delivery of desperately needed "pre-packaged and need-specific" supplies via individual or massed formations of air-drones to specific geographic coordinates.

CLEAN WATER IN CAMEROON (2021)

Providing Clean Water to 1 Million People in Rural Cameroon

The Coalition of Hope Foundation (COH), in conjunction with the project manager, Headway USA and the Government of Cameroon are finalizing the "National Clean Water Program". This grand endeavor will provide a unified team of US and Cameroonian companies - specialized in water, engineering, geology, and power sources, to provide 160 municipalities, towns and villages with reliable, sustainable clean water systems. The impact of the project is broad-reaching:

- 1) Reduce loss of life from disease due to a lack of clean water
- 2) Ring clean drinking water for almost 1,000,000 people in rural areas
- 3) Combat desertification
- 4) Empower women and children

The rural water system will use advanced power generation technology, as all locations will be far from the national electrical grid. Therefore, each locality will have sustainable and renewable energy source(s), modern pumps, for both extraction as well as delivery, and the latest filtration technology. Designed to have an ease-of-operation and servicing for the rural locations, we will ensure the sustainability of the initiative. A consortium of US universities, in conjunction with Cameroonian universities, will design the training and reporting systems (including a management app) for its various levels.

THAI ORPHANAGE CHRISTMAS PARTY (2019)

Holiday celebration in Thailand for underprivileged children

COH, in association with Knightsbridge Bloodstock provided a Winter Holiday celebration in Thailand for underprivileged children and their parents. In addition to the day-long festivities, COH and Knightsbridge provided a grand meal, numerous presents for the children and a financial contribution to build an expansive, modern playground and related facilities at the local Thai orphanage where the event was held. This was a meaningful event which perpetuates our continuing commitment to support the efforts of peace and assistance throughout the world.

HURRICANE IRMA (2017)

Hurricane Irma - Post-Disaster Relief Operations

COH and its partners, Navillus Contracting, sourced and assembled 100 volunteers to provide three hot meals per day, potable drinking water, hot showers, urgent care health services, and operate the only FEMA assistance center in the Florida Keys in the immediate days after Hurricane Irma. COH and their relief partners also delivered emergency supplies and hot meals throughout the community in mobile emergency vehicles donated by 305 Films and the South Florida Film community. COH served in excess of 12,000 hot meals throughout the Florida Keys and distributed more than 1,000,000 pounds of relief supplies, including; diapers, toothbrushes, bug spray, sleeping bags, air mattresses, fuel, generators, canned foods, flashlights, batteries, cleaning supplies, coolers, blankets, pillows, clothes, personal care hygiene kits and 120,000 pounds of ice.

HURRICANE MARIA (2017)

Puerto Rico - Post-Disaster Relief Operations

COH provided humanitarian assistance, disaster relief, and healthcare services while aiding Puerto Rican citizens in re-establishing their economy in the wake of Hurricane Maria. In the immediate aftermath of Hurricane Maria, COH focused resources on providing for the urgent needs of the most vulnerable; children, disabled, and the elderly. Our efforts included providing reliable power sources to restore lighting, cooking, electronic device recharging, communications, refrigeration of fresh foods, infant milk and medications (insulin, antibiotics, immunizations, etc.), and keep essential medical devices operating (e.g. CPAP, Oxygen Concentrators, Drip IV's, etc.). Our organization also distributed thousands of meals via our mobile mass feeding stations to many of poorest victims of Hurricane Maria throughout the mountainous areas of Puerto Rico, where little to no help had existed.

HURRICANE HARVEY

HURRICANE HARVEY (2017)

Hurricane Harvey - Post-Disaster Relief Operations

Hurricane Harvey was the first major hurricane to make landfall in the United States since Wilma in 2005, ending a record 12-year period with no major hurricanes making landfall in the United States.

In a four-day period, many areas received more than 40 inches (1,000 mm) of rain as the system meandered over eastern Texas and adjacent waters, causing catastrophic flooding. The resulting floods inundated hundreds of thousands of homes, displaced more than 30,000 people, and prompted more than 17,000 rescues.

COH, in conjunction with Pathfinders Task Force (PTF) and The Eagles Wings Foundation (EWF) Implemented a system to identify, account for, and provide officials with a listing of homebound and displaced citizens that had been affected by Harvey in the downtown Houston area.

We established a base of operations that provided mass feeding, temporary shelter, security, and basic medical first aid until homebound and displaced citizens could either be transported to a more permanent location or provided with life sustaining support locally. COH also helped to establish a responder communications network in order to conduct door to door surveys for homebound and displaced citizens to assist the National Guard and other first responders in conducting response and relief operations.

COH SUPPORTING AT-RISK WOMEN & CHILDREN (2017)

Emergency housing and support for victims of abuse

COH organized the donation of mobile homes to the Green Oak Ministries in Vista, California to be used as emergency shelter facilities for women and children at risk.

According to COH Founder & CEO, Tim Keegan, "The Coalition of Hope is dedicated to supporting at-risk women and children on a global basis. Although we strive to eliminate the need for such protections, when necessary, it is particularly satisfying to support those who deserve an opportunity to raise their children in a peaceful and secure environment."

The new mobile homes are providing temporary housing for victims of domestic violence, homeless families and adults recovering from substance abuse. Currently a mother and her two small children, victims of domestic violence are residing in one of the units. Safe housing is the first step to rebuilding lives and most of the benefactors are women and children.

ECUADORIAN EARTHQUAKE (2016)

COH Response, Reconstruction & Recovery

On April 16th 2016, the Ecuadorian City of Pedernales was destroyed by a massive earthquake. In response, COH secured emergency aid, shipping containers and cargo space in order to deliver much needed supplies from the US to Ecuador. Subsequently, COH, in cooperation with the Government of Ecuador worked to further the reconstruction of this important coastal town in order to build economic foundations and an improved quality of life.

In 2017, COH senior leadership worked with the Ecuadorian Government to secure \$150M in funding in support of these efforts.

"If we can bring the world together in times of peril, then we can build upon these foundations in times of peace."

- Timothy J. Keegan, Founder and CEO of the Coalition Of Hope.

Grand human endeavors often capture the attention of history. President Kennedy is recalled for sending men to the moon and enabling the Peace Corps. With Project Excelsior, it is hoped that those involved will be remembered for establishing a sea-borne force capable of carrying out life-saving humanitarian missions with efficacy unseen in history. There is an immediate need for such capacity and it is estimated that this will benefit in excess of 20 million lives per vessel.

Please join us in this meaningful initiative.
